

Build the Foundations for a Career in Plant Construction

The Pathway to Plant Construction programme has been designed for adults who are interested in starting a career within the construction, plant operations and infrastructure sectors.

This practical programme provides the skills, qualifications and industry knowledge needed to prepare for employment in the construction industry. Learners will gain an understanding of health and safety requirements, workplace expectations and the qualifications required to access site-based roles.

Successful learners will also work towards obtaining their CSCS Card, helping them become site-ready and increasing their employment opportunities.

What Will You Study?

Introduction to Health and Safety in Construction*

Develop an understanding of safe working practices within the construction industry, including:

- Health and safety responsibilities on site
- Common workplace hazards and risks
- Safe use of equipment and machinery
- Personal Protective Equipment (PPE)

Getting Work Ready*

Develop the employability skills employers look for by learning how to:

- Prepare for interviews
- Create an effective CV
- Search and apply for jobs
- Build confidence and communication skills

Maths & English in Construction*

Develop practical skills that can be applied directly to construction roles, including:

- Measuring and calculating quantities
- Working with dimensions and scale
- Using workplace documents and instructions
- Understanding industry terminology

Industry Visit to MP Plant *

Gain valuable insight into the plant construction sector through a visit to MP Plant, where learners can:

- Learn about plant and machinery operations
- Understand career opportunities within the sector
- Meet industry professionals
- Agree next course for the pathway
